

RC Laser Evening Workshops

NB. These workshops are open to all MLMYC members

Workshop 1

Wednesday 9th May, 6.30pm at the Boatshed – Time 1.5 hours

Jurgen Luther – RC Laser Boat Maintenance

Jurgen has been regularly sailing RC Lasers for longer than any other South Australian and he always keeps his boat in top shape. Who better to tell us all about maintaining our boats.

This workshop will cover basic boat and sail care, changing servos, keeping your cockpit dry, allowable boat modifications, how to set up sail adjustment sliders, adjusting your rudder and mainsheet range of movement and other common problems. This workshop is a must for the committed RC Laser sailor.

Workshop 2

Wednesday 20th June, 6.30pm at the Boatshed – Time 1.5 hours

Simon Irving – The Rules of Sailing (Round 1)

Simon is a sailing judge and umpire at the National level. He has a huge amount of experience in dealing with and interpreting the rules of sailing. This session will be conducted 10 days after the SA State Titles, and many people will have particular rules they wish to discuss as a result of participating in this event.

Simon will conduct an interactive session, taking time to go over a number of rules about right of way and collisions. He will particularly focus on collisions around marks and how to avoid them.

There will be a second workshop in this series in the lead up to the National Titles in September-October.
